SUMMARY

US Citizen, PhD Student specializing in Computer Systems Security, seeking interesting problems to solve with interesting people

EDUCATION

The Ohio State University Columbus, OH
Ph.D. Computer Science Engineering Expected 2030
Advisor: Professor Carter Yagemann

The Ohio State University Columbus, OH
B.S. (Magna Cum Laude) Computer Science Engineering 2024

SKILLS

Programming: Python, C, C#, Java, JavaScript, x86, ARM, RISCV
Tools: Bash, Git, LaTeX, Docker, Excel, Ghidra, Angr, Qemu, GDB, Chipwhisperer

RESEARCH EXPERIENCE

Battelle Memorial Institute Columbus, OH
Cyber Engineer *September 2026 – Present*

- Contributed to multiple government-sponsored cyber R&D efforts under need-to-know constraints

The Ohio State University Columbus, OH
Graduate Research Associate *August 2026 – Present*

- Introduced RACI-based project governance for an 8-person research team, reducing ownership ambiguity and coordination overhead
- Developed a portfolio of scoped training-wheels projects to accelerate master's student onboarding and establish paths to independent research ownership
- Co-authored a young-faculty proposal from concept through technical narrative, combining OSINT, related-work analysis, and sponsor-context research to shape problem framing, competitive positioning, and differentiating research thrusts

Battelle Memorial Institute Columbus, OH
Cyber Trust & Analytics Intern *May* 2026 – September 2026

- Contributed technical content and sponsor framing to both pink and red team efforts for DoD calls for proposals
- Collaborated directly with government sponsors to refine research objectives and communicate progress
- Proposed multiple research projects; Developed reproducible tooling and experimental infrastructure
- Established a channel for the cyber intern cohort; Facilitated knowledge sharing and cross-team communication
- Operated as the most independent intern; Owned challenging technical problems

The Ohio State University Columbus, OH
Graduate Fellow August 2025 – August 2026

- Proposed a project with the NSA; Managed tasking for 2+ undergraduate assistants
- Operated as the de facto co-advisor and lab representative for Fault Injection research

The Ohio State University Columbus, OH
Undergraduate Research Assistant October 2024 – August 2025

- Created a demo for a firmware vulnerability analysis tool
- Presented to DARPA program managers and partners at Battelle
- Challenged ideas and made plans to incorporate the work of other students
- Created simulations for detecting fault injection vulnerabilities in binaries
- Operated as the de facto recruiter for the W3CIL lab; Helped identify and onboard new students

TEACHING EXPERIENCE

The Ohio State University Columbus, OH
Undergraduate Teaching Assistant September 2022 – December 2022

- Graded assignments for a Data Structures and Algorithms course
- Assisted Professor Nick Painter during office hours and in the flipped class

OTHER PROFESSIONAL EXPERIENCE

Intel Corporation Remote, USA
Software Intern January 2023 – August 2023

- Researched, experimented, and documented the containerization process
- Managed communications with an end customer while developing my own website module
- Trained and supported a new intern: Handled the stress of colleagues with empathy
- Independently Screen wrote an idea for a spoof promo video based off a company inside joke
- Pitched funny ideas to coworkers, managers, and a chief of staff

Symposium Finance Incorporated Columbus, OH
Co-founder/Developer August 2020 – May 2021

- Built and deployed a Python Website on AWS cloud
- Managed outreach: Competed in university startup competitions

SERVICE

Volunteer at Mid-Ohio Food Bank
